Professional Summary

Full Stack Engineer with 4+ years of professional and freelance experience delivering end-to-end features across **Django REST Framework (DRF)** backends and **React** frontends backed by **PostgreSQL**. Own production services from data modeling and REST API design through deployment, authentication and authorization (JWT, OAuth), debugging, and release management. Daily user of **AI-assisted development workflows** (Claude Code, GitHub Copilot, Cursor) for implementation, debugging, refactoring, and code quality. Experienced working directly with stakeholders, estimating work, and shipping maintainable features with minimal supervision.

Technical Skills

- **Backend:** Python, Django, Django REST Framework (DRF), REST API Design, Flask, FastAPI, GraphQL, Authentication, Authorization, JWT, OAuth
- **Frontend:** React.js, TypeScript, JavaScript, Next.js, HTML5, CSS3, Tailwind CSS
- **Databases:** PostgreSQL, MySQL, Supabase, SQL, Relational Data Modeling, Query Optimization
- **DevOps and Deployment:** Git, GitHub, Docker, CI/CD Workflows, Vercel, Environment Configuration, Production Deployment
- **AI-Assisted Development:** Claude Code, GitHub Copilot, Cursor, OpenAI, Gemini, LLM API Integration, AI-assisted debugging and code generation
- **Mobile:** React Native, Capacitor, Expo, Android, iOS, Mobile API Integration
- **Mobile Release:** Google Play Console, App Store Connect, App Signing, Versioning, Store Submission
- **Tools:** Postman, VS Code, npm, Yarn, Figma
- **Engineering Practices:** End-to-End Feature Delivery, API Design, Code Review, Root Cause Analysis, Technical Documentation, Agile Collaboration

Professional Experience

Django Developer, Khatra Tech

January 2024 - January 2025

- Developed and maintained production backend services using **Python, Django, and Django REST Framework (DRF)**, implementing REST APIs consumed by web and mobile clients.
- Designed backend business logic, API endpoints, **authentication, authorization**, and database workflows for production applications.
- Worked with **PostgreSQL and MySQL** to design relational data models, write SQL queries, maintain data integrity, and troubleshoot database-related issues.
- Integrated frontend applications with Django REST APIs and collaborated with frontend developers to deliver complete end-to-end features.
- Investigated and resolved backend, API, authentication, database, and production issues using structured root-cause analysis and debugging.
- Used **Git**-based development workflows for version control, feature development, bug fixes, code review, and collaborative delivery.
- Configured application environments and deployment workflows while maintaining reliable communication between frontend, backend, and database layers.
- Collaborated with stakeholders and developers to understand requirements, estimate implementation work, and deliver maintainable production features.

Freelance Full Stack / Mobile Application Developer

June 2023 - Present

- Built and maintained production web and mobile applications using **Python, Django, React, Next.js, React Native, Capacitor, TypeScript, and REST APIs**.
- Developed Django REST APIs and backend services supporting authentication, user management, business workflows, data processing, and mobile application integration.
- Built responsive **React and Next.js** interfaces and integrated them with backend APIs, **PostgreSQL, MySQL, Supabase**, and other application services.
- Developed and maintained cross-platform mobile applications using **React Native and Capacitor**, integrating REST APIs, authentication, device capabilities, and production backend services.
- Managed mobile application build and release workflows, including **Android AAB generation, application signing, version management, Google Play Console releases, iOS/Xcode builds, and App Store deployment troubleshooting**.
- Diagnosed and resolved production issues across frontend, backend, mobile, database, authentication, API, and deployment layers.
- Used **Docker, Git, GitHub, Vercel**, Xcode, Android Studio, Postman, and cloud deployment workflows to develop, test, debug, and ship applications.
- Worked directly with clients and product stakeholders to translate requirements into production features, communicate technical decisions, and independently own implementation from development through release.
- Used **AI-assisted development workflows and LLM-based coding tools** to accelerate implementation, debugging, refactoring, documentation, and technical problem solving.

Selected Projects

Handsy - Production Marketplace Platform
React, Next.js, Django, REST APIs, PostgreSQL, TypeScript

- Built and maintained a production marketplace platform connecting customers with craftsmen through a modern React/Next.js frontend and Django-based backend.
- Developed and integrated REST APIs for authentication, user management, marketplace workflows, profiles, and application data.
- Implemented multilingual application functionality and worked across frontend, backend, database, and deployment layers to deliver production features.
- Diagnosed and resolved production UI, API, authentication, and data integration issues while coordinating changes across the full application stack.

Mock Interview Evaluation System - AI Application
Python, Django, React, LLM APIs, REST APIs

- Built an AI-assisted interview evaluation application using Python/Django backend services, React frontend, REST APIs, and LLM-based evaluation workflows.
- Integrated AI services for automated interview response analysis and evaluation while maintaining structured application data and API communication.
- Developed backend workflows for processing user responses, generating evaluations, and delivering results through the application interface.

DataBrakes - Production Data Processing Platform
React, Next.js, TypeScript, Django, PostgreSQL

- Developed a production data processing platform with React/Next.js frontend, Django backend services, PostgreSQL data storage, and REST API integration.
- Implemented structured file ingestion and processing workflows for CSV, Excel, JSON, and ZIP data with validation and error handling.

- Built frontend data preview, history, pagination, and table workflows while integrating backend APIs for reliable data retrieval and processing.
- Debugged file processing, API communication, database, and frontend issues across the full application stack.

Victory Bistro Ultra Lounge - Mobile Application
React, Capacitor, Android, iOS, REST APIs

- Developed and prepared a cross-platform mobile application for Android and iOS using web technologies with Capacitor.
- Managed production mobile build workflows including Android AAB generation, application signing, versioning, deployment configuration, and Google Play Console release processes.
- Troubleshot Xcode, iOS build, signing, CocoaPods, Android build, and store submission issues throughout the release lifecycle.
- Integrated frontend functionality with backend APIs and resolved production issues across mobile, API, and deployment layers.

Core Competencies

• **Backend Engineering:** Python, Django, Django REST Framework, REST API architecture, authentication, authorization.

• **Full Stack Development:** React, Next.js, TypeScript, JavaScript, Django, PostgreSQL, MySQL.

• **Mobile Engineering:** React Native, Capacitor, Android, iOS, mobile API integration, production releases.

• **Production Ownership:** Feature development, debugging, deployment, monitoring, release management, incident resolution.

• **Database Engineering:** PostgreSQL, MySQL, Supabase, SQL, relational data modeling and troubleshooting.

• **AI Development:** LLM integrations, AI-assisted coding, automated evaluation workflows, AI-powered application features.

• **Collaboration:** Product collaboration, client communication, technical decision-making, independent ownership, cross-functional teamwork.

Education

• **Bachelor of Engineering in Computer Engineering**, 2022 - Present
National College of Engineering, Lalitpur, Nepal
Relevant Coursework: Data Structures and Algorithms, Database Systems, Operating Systems, Software Engineering, Web Technologies, Computer Networks, Database Management Systems

• **Higher Secondary Education (Science)**, 2021
Gorkha International Public School, Nepal

Additional Information

Location: Lalitpur, Nepal; available for on-site work in Kathmandu Valley; open to fully remote roles
Work Authorization: Nepal
Languages: English (Fluent), Nepali (Native), Hindi (Fluent)
Availability: Available for full-time remote opportunities
